QQube Updates and Upgrades

This How-To Guide is for QQube Versions 7.x from 6.x or 7.x

If you want to upgrade to QQube Version from Versions 5.x and earlier, [please use these special instructions.](#)

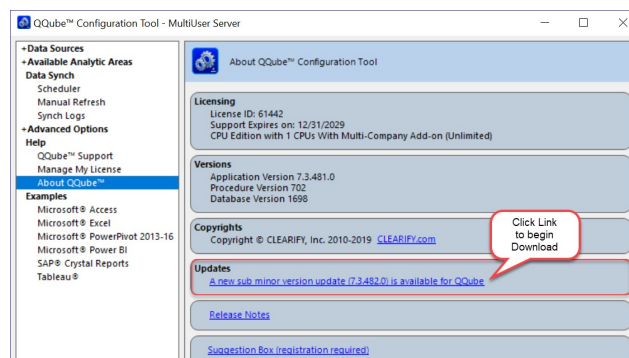

QQube purchases are based upon a yearly semi-subscription licensing model, where updates - and upgrades - are provided for free during that time period. QQube will continue to operate past the yearly subscription period - without the need to purchase an upgrade license - unless Intuit makes structural changes to its database that require QQube to follow suit.

Updates past the yearly subscription period require an upgrade license, which can be purchased directly from the [CLEARIFY Web Store](#).

[What gets installed.](#)

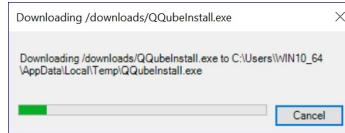

Downloading An Update

In the QQube Configuration Tool, click on **Help>About QQube**.

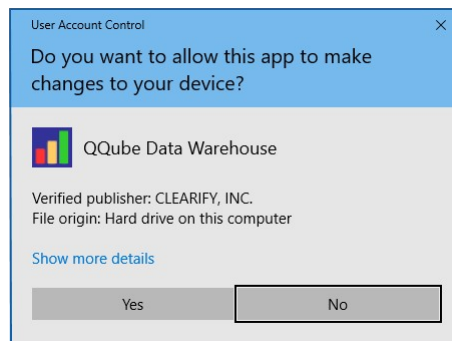

A message will be displayed when updates are available, and you can click on the link to begin the download:

Upon completion of the download, the installation process will begin automatically.

Procedures for Installing Updates

General Information:

- The QQube update installation will keep ALL settings, and bring over ALL data.
- It will not be necessary to execute any of the configuration procedures that were performed in the initial installation - including user setup, subject choices, or adding additional companies.
- These procedures are NOT affected in any way, by the fact that you may have a multi-company add-on.

Pick the correct installation type:

- [Single User](#)
- [Multi-User: Local Network](#)
- [Multi-User: Remote Desktop Environment](#)
